

# PROGRAMA DE PÓS-GRADUAÇÃO EM ECOLOGIA PROJETO CAPES/PrInt

Universidade Federal de Santa Catarina Ecoando Sustentabilidade

Apresentam

13-26 of January

Centro de Ciências Biológicas

## Summer Course ECHOing sustainability

Come to Florianópolis to discuss about main global coastal/marine problems, related with climate change, ocean acidification and local stressors. In an atmosphere of construction and innovation, with laboratory and field experiences, under the supervision of a multidisciplinary team, **with Jason Hall-Spencer**, a visitant professor from University of Plymouth, we will discuss about how to characterize these main stressors, their socio-environmental consequences and built potential solution.
