

PROGRAMA DE PÓS-GRADUAÇÃO EM ECOLOGIA

PROJETO CAPES/PrInt

Universidade Federal de Santa Catarina Ecoando Sustentabilidade

What: Talk

When: January 13

Where: Auditório Reitoria

Carbon dioxide seeps reveal the ecosystem-level effects of ocean acidification

**Visitant professor Dr. Jason Hall-Spencer,
University of Plymouth, UK.**

Jason is a Full Professor of Marine Biology at the Universities of Plymouth in the UK and Tsukuba in Japan and is an Adjunct Professor at Xiamen University in China. His group conducts applied research to provide policy makers with the scientific information needed to best manage the marine environment. This research ranges from deep-sea benthos, fisheries, aquaculture, marine protected areas, invasive species and seamounts.
